Description

Dear Ijaz,

In Package screen, We selected a customer and added an item for which an order had already been placed. The same item appears in many lines (around 50 lines) in a drop-down list when the item number is entered. One of the lines will be the correct one, and the error "Qty Exceed order Qty" will appear if we select any other lines. [Attached Video]

Dear Noufal,

Please assign to some one to fix this case. Also, if we choose a customer and enter an item. If the item ordered by other customer we can add to cart that order also.
