

Temp Projects - Tasks #4401

Stock valuation - Search by Parent Category

09/30/2021 03:04 PM - Rijas P

Status:	Closed	Start date:	09/30/2021
Priority:	Urgent	Due date:	
Assignee:	Mohamed Suhail	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:		Spent time:	0.50 hour
Description			
Issue 1			
Chose a root Category "Hanging Items" from product Category dropdown, Group by given as "Parent Category".			
But once report generated, all Parent categories listed properly, but showing the root Category " Hanging Items" also in the list. once clicking on Hanging items showing some categories which are under another parent Category. PFA			
Expect Result : only Show all parent Categories under the selected Root Category.			
Issue 2			
Need a back button if we drill down from {Root--> Parent-->Product Category-->Products} to reenter each revise steps.[Now working only browser back button, but sometimes it's not loading]

Chose a root Category "Hanging Items" from product Category dropdown, Group by given as "Parent Category".

But once report generated, all Parent categories listed properly, but showing the root Category " Hanging Items" also in the list. once clicking on Hanging items showing some categories which are under another parent Category. PFA

Expect Result : only Show all parent Categories under the selected Root Category.

Issue 2

Need a back button if we drill down from {Root--> Parent-->Product Category-->Products} to reenter each revise steps.[Now working only browser back button, but sometimes it's not loading]

Issue 1 - A few items are set directly with category = Other Hangings which is actually a Parent category on the hierarchy

Please correct it, then the report will work all fine

Issue 2 - will require major work in order to make it work as suggested above. We will look into it later or Can be done through the BI module reports
