Can we update the euro test with the latest retail version and check whether the issue exists?

[Noufal K](#) I have tried the same in my local and found the issue with Euro DB
It seems related to uom conversion when some of the items are partially received

Please create buzilla with proper test cases.

It's better to try with euro db if possible as it is not easy to replicate the case

Rijas,

The issue happened because some of the items ordered uom conversion is made inactive on the system

For example: EU21705 (PFA)

There exist a few other items also and one other order
See details below
