Description

We have updated purchase price of Some items [Dollar Price list] PFA [Dollar price update.jpg] and after that added these items in PO screen and choose the biggest Uom then the PO price is showing wrong. PFA [PO screen.jpg].

In our case, we are updating the price only for smallest Uom, So even we choose the biggest uom the price should be "Smallest Uom price X Divide rate".

Please correct the biggest Uom price of all items and kindly provide a permanent fix.

Admin team,
Please schedule the below script to run on every day 8 AM UAE time (on central , mini and backup server)

```
delete from m_productprice where c_uom_id=1000000 and m_pricelist_version_id in (select m_pricelist_version_id
from m_pricelist_version where m_pricelist_id=1000003);
```

[Redmine Admin](#) please do the needful
Change the existing script on a hourly interval
Are we running the same script on mini server also? If yes, please make the change there also

#11 - 07/18/2022 12:19 PM - Ahamed Danish

Changed script running on euro central,mini and backup to run on hourly basis.
