<b>Category:</b>		<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>		<b>Spent time:</b>	2.00 hours
<b>Description</b>			
Issue 1 :			
Once selecting items of different vendors and click on Create PO [PFA 1,2,3]			
Eg: Selected 3 items from the reorder report of 3 separate vendors			
Actual Result:			
A single order will be drafted, the purchase order will be created under the vendor of last item selected from the reorder report.			
Expected result:			
3 Orders will be drafted, the purchase order will be created under the vendor which we mentioned in product master. [Working as expected while doing purchase indent]			
Suggestion 1:			
Need an option to give remarks to each product line while items loaded to PO screen after clicked on Create PO from Reorder report. [Same as Purchase indent screen, "Double click on item line and one Pop will get to give comments"]			
Suggestion 2:			
The values showing in reorder Qty columns should be colored in Bold Red color to identify quickly.[Same as Qty on hand if -ve stock] PFA "Reorder Qty Column.jpeg"			
Suggestion 3:			
Freeze the header while scrolling down from reorder report.			
Suggestion 4:			
Show the Item image on PO screen			
Suggestion 5:			
Product attribute POP up in reorder report.			
Suggestion 6:			
Warehouse filter in reorder report.			
Suggestion 7 :			
It will be great if we can give the order Qty of the item while selecting that item from reorder report. If we select an item need to get a pop up to enter the PO Qty [Biggest Uom] and the remarks. after selected all items and clicked on Create PO, then the items will be loaded with the Qty we mentioned earlier in the Pop up.

Dear Muzammil/Suhail,

As we discussed regarding on Suggestion 3: If you need time to implement freeze panes, please bring the cursor caption in this report. While cursor is kept in any column the column heading must be captioned below the cursor.

This report mainly checking by our management staffs, hence request you to do this an immediate basis.
